## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03 September 2008 has been entered.

### ***Response to Arguments***

2. Applicant's arguments with respect to claims 17-19 have been considered but are moot in view of the new ground(s) of rejection. Applicant's arguments with respect to claims 1, 2, 5-10 and 12-16 are persuasive.

### ***Claim Objections***

3. Claims 10, 18 and 19 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. These claims recite that the circuit board is a flexible circuit board, however the claims from which they depend already require that the circuit board be flexible.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Kondou et al. (US 5,021,888).

**[claim 17]**

Regarding claim 17, Kondou discloses an image sensing and processing unit comprising: a signal processing device (Figure 5, Items 13); an image sensing device stacked on and electrically connected to the signal processing device (Figure 5, Item 10); and a circuit board including a first flexible circuit board electrically connected to the signal processing device (Figure 5, Item 32) and a second flexible circuit board electrically connected to the image sensing device (Figure 5, Item 31).

**[claims 18 and 19]**

Regarding claims 18 and 19, note that the first circuit board is a flexible circuit board.

***Allowable Subject Matter***

6. Claims 1, 2, 5-10 and 12-16 are allowed.

**[claims 1, 2, 5-10 and 12-16]**

7. Regarding claims 1, 2, 5-10 are 12-16 the prior art does not teach or fairly suggest a camera module as claimed wherein a first flexible circuit board is electrically connected to the signal processing device and a second flexible circuit board is connected to the image sensing device. While the use of flexible circuit boards for connecting image processing and image sensing devices is known in the art, the use of a first and second flexible circuit board as claimed is not taught or suggested.
8. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
